ERCON FORAYS INTO DOMESTIC PRODUCT MARKET

Ercon has come up with products for the domestic market replacing conventional materials

Ercon has forayed into the domestic market with its products replacing the conventional materials.

Products like main gates for houses, fencing, boundary rails, door frames etc.

Combination Composite Fencing

FRP Main Gates for houses, parks, industries and other places are

excellent. These are light weight and aesthetically good. A 5feet height and 14 feet wide gate weighs just 53 kgs!! These gates can be made in different sizes and shapes.

FRP Fencing is another great product for house, farms, and other fencing requirements. Ercon fencing is finding use in diverse places like: open spaces, houses, industries, race course; as tree guards, etc. Ercon's sister concern Chirag Enterprises has developed aesthetically appealing combination composite fencing for resorts, hotels, farm houses and bungalows.

Ercon FRP Door Frames

are designed for ease in installation. These door frames have long life and are termite resistant, water resistant, paintable, and can be fire retardant. Ercon door frames are

ideally suitable for areas where doors get damaged due to water, termites etc. , like - bathroom doors, doors on

Water Resistant, Termite Resistant, Paintable & Fire Retardant - Main Gates, Fencing, Boundary Rails & Door Frames are high strength & aesthetic in looks.

roof top and doors for rooms/cabins out in the open.

Ercon's above products are now finding wide applications in building & construction industry.
